PROJECTS

Ferrari Workshop Management System

An enterprise workshop management platform developed for vehicle inspection, damage assessment, service estimation, and reporting.

Features :-

OCR recognition | Part mapping | Interactive 3D model | 3D vehicle inspection | Damage assessment | Service estimation | Animation | Isolation mode | Reporting

Tech Stack :- Next.js | TypeScript | Material UI | Three.js | Node.js | Express.js | MongoDB

Areas of Responsibility :-

- Developed interactive 3D vehicle-inspection functionality
- Integrated OCR-recognized parts with the 3D model
- Implemented part selection, highlighting, isolation, and animation
- Developed damage-assessment and cost-estimation workflows
- Designed REST APIs and MongoDB data models

TABI Marketing Automation Platform

A marketing automation platform for creating email campaigns, managing customer segments, and sending scheduled notifications.

Features :-

Email template builder | Campaign scheduling | Automated notifications | Customer segmentation | Advanced filtering | Large-data handling

Tech Stack :- Next.js | TypeScript | Material UI | Node.js | Express.js | PostgreySQL

Areas of Responsibility :-

- Developed the dynamic email-template builder
- Implemented campaign scheduling and notification workflows
- Created advanced customer-search and filtering functionality

Cinema POS & Management System

A cinema point-of-sale and management platform for ticket booking, food ordering, offers, and transaction reporting.

Features :-

Ticket booking | Movie scheduling | Food ordering | Offer management | Ticket templates | Transaction reports | PDF generation

Tech Stack :- Vue.js | JavaScript | Node.js | Express.js | SQL |Knex.js

Areas of Responsibility :-

- Developed cinema POS screens and management dashboards
- Implemented ticket-booking and food-ordering modules
- Built transaction reports and PDF-generation functionality
- Integrated frontend applications with REST APIs
- Resolved production bugs and performance issues
